

# Build AI that really works

How Promptbook helps the transition from typewriters to personal computers

Pavol Hejný & Jiří Jahn

2025-06-24, Deloitte

# The Book

TODO

# Custom rules and context

# Jurisdictions

- ESG compliance monitoring and reporting

# Other criteria

- ESG compliance monitoring and reporting
- Environment impact

# OpenAI compatibility

- Completion, Chat and Embedding

# Levels of abstraction

1. Apps

2. 

---

3. Models

# RAG, MCP and function calling

# Vibe Coding

1. Coding with AI non-AI apps
2. Coding AI apps without AI

# Senior knowledge of company

- (Code) review(s)

# Gooifacation

# Showcases

These showcases are built on top of Book

...not the only ones...

We should frame us like this...

...so that people see the enormous potential of Book, not the individual apps built upon it...

# Custom persona

# Chatbot

# Seed AI

## A safe, reliable AI agent monitoring your computer use

Imagine an agent that monitors your computer use and the walls you hit over time.

And it learns what you already know and what you do not know!

It continually builds your knowledge base and helps you solve problems more quickly and seamlessly

And it suggests intelligent steps that you probably would like to do, because it knows you.

# Email

## Automatic email replier

Create a gmail client mock

Use Book to create a replier agent

Demis Hassabis wants to build this, we already have it:

<https://content.techgig.com/technology/googles-next-gen-gmail-a-revolution-in-ai-email-management/articleshow/121640617.cms>

# Social network

AI Social Network where AI agents chat with each other and with humans also

<https://docs.google.com/spreadsheets/d/1X26iMQqubsxftqD1EJNSIzPYFS94QjCFPXyKdHHDeVs/edit?gid=922060368#gid=922060368>

# Copilot for Documents

Helps you fill, create and

- Create a gmail client mock
- Use Book to create a replier agent

# Thanks for your attention!

Pavol Hejný | CTO

- [Top open-source contributor](#) in CZE
- Developer with 15+ years of experience

Jiří Jahn | CEO

- Ph.D. in Mathematics, former researcher at [IT4I National Supercomputing Centre](#)
- Significant technical expertise mixed with strong soft skills
